- Handling (Physical Aspects) : When transferring from one container to another apply earthing measures and use conductive hose material. Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. Vapours may form explosive mixtures with air. Vapours are heavier than air and may spread along floors.
- Dust explosion class : No applicable data available.
- Storage : Keep away from oxidizing agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.
- Storage period : No applicable data available.
- Storage temperature : No applicable data available.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

- Personal protective equipment
 - Respiratory protection : In the case of vapour formation use a respirator with an approved filter. Mask with gas filter, type A (EN 141)
 - Hand protection : Material: butyl-rubber
 Glove thickness: > 0.4 mm
 Wearing time: 8 h
 Additional protection: Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves.
